

1 ABSTRACT OF THE DISCLOSURE

2 A method and means is disclosed for remotely reading the status of and
3 controlling irrigation components and ancillary equipment. A handheld remote user
4 interface (RUI) is provided which includes a display and a keypad. The RUI has the
5 ability to communicate with and control the irrigation components using built-in wireless
6 telemetry technology. The RUI allows the user to read the status of and control the
7 irrigation components and ancillary equipment from any location in the field, without
8 requiring the user to be at the irrigation component controls or at a specific location in
9 the field.
